

Notes from the CONTRA partner meeting

Date: 01.10.2019, Tallinn

1. Introduction made by member of the Ministry of the Environment (Rene Reisner) who greet project participants and explained scope of interest

Estonian Priorities for upcoming perspective:

- Fish farming and development of fish industry,
- Use of green energy and especially wind mills,
- Cutting down the pollution in water and nutrients amounts present in it,

Use the results created by project to improve local policies

At the end of week he wishes successful meeting

Short round introduction made by every partner to bring closer new present representatives

2. WP2 session (chair Jane Hofmann, EUCC in collaboration with Krinova)

Working Group cooperation state of impact should be focus on seventh key elements:

- Stakeholders: State which key stakeholders you have contacted/engaged with.
- Stakeholder Directory: Has your local/national stakeholder list been created?
- Working Groups: Has the first meeting been held? Where?
- Local Authorities: Which LAs have you or your national partners engaged with?
- Capacity Building: Please give details of progress made – concrete achievements
- Knowledge Exchange: Give details of exchanges e.g. cross project collaboration
- Planning: Give details of your next stakeholder and capacity building activities

We should follow them and use in preparations of new working groups meetings

We will be asked to provide every three months information about stakeholder Directory (the file could be found in Unibox)

The local authorities contacted and engaged this is key aspect of this capacity building activities

Socio-Economic Impact of Beach wrack:

We are asked to provide local studies to improve more information which will help us in Description of socioeconomic impact of beach wrack We are missing data which should be shared by all partners;

We should convince and increase our efforts on the the local authorities to fill in Local Authority Questionnaire

Stake holders gathering should take place twice per year

Local Authorities Survey and public Survey should be finished at the end of November of 2019

Awareness raising: Beach wrack cycles & possibilities for eco-system services will start in the first period of 2020 and will be focus on Beach Wrack Cycles

Then we describe GoA 2.4 Project communication status

Communication Tools

We should provide information for project's Facebook page [@beachwrack.CONTRA](https://www.facebook.com/beachwrack.CONTRA) and website <https://www.beachwrack-contra.eu/>

There is project flyer which could be produced for individual demand in national language

Those flyers include project Overview

If we will need requirements of local lvl – we should send proper require to Jane Hoffmann

3. In afternoon WP4 session lead by Torben Olsson, Krinova started with Presentation prepared and discussion of the GoA 4.1 timeline regarding the document on Beach Wrack law regulations held by Marcin Żuchowski

- Legal statue of BW
- We should be focused what is allowed by law for example how to collect (ways of harvesting)
- What are condition's that must be fulfilled to store BW
- Beach Wrack processing (ways of treatment and legislation possibilities of BW conversion)
- What kind of permits must me gained
- Whats will be if the material will stay in the beach for example use as a dunes (city on Flensburgs) – ekonfurther
- In Russian case we should also investigate laws and regulations, including the presidential of Russian Federation and president decree

GoA 4.2/4.3 – Jens Almquist Presentation and discussion of the GoA 4.2 working plan and introduction to the Krinova working model as well as the PPP (Private Public Partnership Canvas)

- Krinova will visit each individual case study location and facilitate workshops
- stakeholders present and included in the work
- will bring content for WCG of Beach Wreck meetings
- will present working models
- feedback from all WPs including results from all Contra case study

Open innovation – sharing knowledge

- Business model importance to describe how value is created and distributed as well as how the business plans look like.
- different methods and tools which can be developed after information gathering – The business Model Canvas – business
- it's goanna be the way of investigation on which we will need different perspective

What have to be developed:

- take care of the involvement of local governments in the project and provide them with practical solutions
- present what is going on locally in case study studies
